Office Action Summary

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-3, drawn to a plasma apparatus for film formation and cleaning, classified in Class 118, subclass 723R+.

II. Claims 4-5, drawn to a method for cleaning the plasma chamber and coating a substrate via a plasma in the chamber, classified in Class 427, subclass 569 or 534.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used for different processes, because the gases employed by an apparatus are not part of that apparatus, and as claimed provide no structural limitations to the apparatus. Different uses for the apparatus include using the cleaning gas to clean the substrate instead of the chamber, or to use the "film forming gas introduction pipe" to input plasma etching gases to etch the substrate, thus performing a different plasma process.

Art Unit 1762

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Floyd Carothers on 11/20/02 to request an oral election to the above restriction requirement, but did not result in an election being made. Mailing was requested.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit 1762

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication should be directed to M. L. Padgett from Monday through Friday from about 8 A.M. to 4:30 P.M. at telephone number (703) 308-2336 and FAX #703 872-9310 (official), 872-9311 (official after final) and 305-6078 (unofficial).
